## PROFESSIONAL SUMMARY

Highly motivated and results-driven aspiring Full Stack Software Engineer with a specialization in Python backend development (Django, FastAPI) and a strong foundation in modern frontend frameworks (React, Next.js). Possesses practical experience in designing and deploying scalable RESTful APIs, integrating AI/ML solutions, and leveraging cloud platforms (AWS, GCP) for robust applications. Eager to contribute to innovative web solutions, demonstrating strong problem-solving skills, collaborative design, and a commitment to delivering high-quality, client-facing products within dynamic team environments.

## PROFESSIONAL EXPERIENCE

### Junior Software Developer at Messianic Assembly of Yahweh (Volunteer Project)

2024

- Led the full-stack development and deployment of a responsive website, utilizing Django REST APIs for the backend and modern frontend principles (HTML/CSS, JavaScript, Bootstrap) to streamline church management and outreach.
- Configured and maintained cloud servers, demonstrating practical exposure to AWS services (e.g., S3 for asset management) and implementing security and performance best practices to ensure high availability.
- Collaborated effectively with stakeholders to gather requirements, translating organizational goals into functional technical solutions and actively contributing to design and usability improvements for client-facing products.

### Digital Publications & Leadership Intern at Transform.Ed

2025

- Contributed to strategic email campaigns and newsletters for the Transform.Ed program, directly impacting audience growth and engagement metrics.
- Refined content strategy and collaborated with cross-functional teams to ensure consistent messaging and support high-quality lead generation efforts.
- Authored comprehensive Standard Operating Procedures (SOPs) to scale and document efficient publication workflows, improving operational consistency and team efficiency.
