February 10, 2026

Dear Hiring Manager,

I am writing with immense enthusiasm to express my interest in the Full Stack Developer position at EA Data Handlers. The opportunity to contribute to the complete lifecycle development of a comprehensive Loan Management System, particularly in the dynamic Kenyan financial sector, deeply resonates with my professional aspirations as an aspiring full-stack developer with a strong foundation in Python backend technologies and cloud automation.

While my professional experience is primarily foundational, my robust technical skill set in Python (Django, FastAPI), modern frontend frameworks like React and Next.js, coupled with expertise in PostgreSQL, MySQL, Docker, AWS, and GCP, equips me to design and implement scalable system architectures and secure database designs – critical for any financial application. I am adept at building robust RESTful APIs and understand the principles of CI/CD, which are vital for reliable system deployment and integration. Although I may not have direct previous fintech application experience, I am a highly motivated and adaptable individual, committed to applying security best practices and delivering high-quality, reliable solutions for a critical project like a Loan Management System. My proven ability, as demonstrated through self-driven projects, to integrate AI/ML solutions and leverage AI-powered tools ensures an innovative approach to development.

My strong soft skills, including clear communication, collaboration, and self-motivation, ensure I am well-prepared to develop comprehensive technical and user documentation, and provide effective user training. I am particularly drawn to EA Data Handlers' mission to build essential financial infrastructure in Kenya, aligning with my commitment to designing and deploying real client-facing products that make a tangible impact. I am confident in my ability to quickly adapt and contribute meaningfully to your team, ensuring project deadlines are met. As this is a contract/project-based role, I am immediately available to commence work.

Thank you for considering my application. I am eager to discuss how my technical acumen and passion for innovative development can benefit EA Data Handlers in building a robust Loan Management System. I am available for an interview at your earliest convenience.

Yours sincerely,

KIPTOO CALEB +254702171495 calebkiptoo9090@gmail.com
